

## Palladio V.90L

### DESCRIPTION

***For high speed Internet access over PSTN with your Laptop!***

Always on line. Palladio V.90L can operate over the switched network at 56 Kbps according to the V.90 and K56Flex standards.

Top performances. Palladio V.90L supports the 56K technology for the Internet access and the send/receive fax up to 14.400 bps Gr.3 over the switched network.

Maximum compatibility and convenience. The international line interface is homologated according to the CTR21 specifications to guarantee the maximum compatibility wherever you are.

The modem integrates the line connector for a direct connection of the telephone line to the PCCARD (dongless).

No adapter is needed. The modem status can be controlled by simply looking at the led indicators on the card.

Palladio V.90L can operate with Windows® XP, 2000, Me, 98, 95, NT, Macintosh® and others to satisfy any user's need.

It is Flash upgradable to be always updated with new standards.
